Psychology Climate Report

December 5, 2019
Leah Somerville
Chair, Departmental Climate Committee
Psychology Department
Climate Committee

Current Members

Joshua Cetron (PhD student)
Hayley Dorfman (Postdoc)
Lindsay Hanford (Postdoc)
Daniel Janini (PhD student)
Katie McLaughlin (Faculty)

Franchesca Ramirez (PhD student)
Daniel Reznik (Postdoc)
Shirley Wang (PhD student)
Erika Weisz (Postdoc)
Kelly Zuromski (Postdoc)

Former Members

Fiery Cushman (Faculty)
Ashley Thomas (Postdoc)
“The purpose of this committee will be to generate topics that concern departmental climate and raise them for discussion within faculty meetings and with the department as a whole.”
- Prof. Mahzarin Banaji
Casting light on our department’s climate

**2019 objective**: Learn about our department’s climate, as experienced by all members of the department

**2020 objective**: Engage in activities to strengthen our department’s climate
Today’s presentation

Summarize results of the climate survey
  • Goals
  • Methods
  • Analysis
  • Limitations

Immediate next steps
  • Review full report
  • Assemble as a community to discuss them and recommend ways to improve our department (December Town Halls)

Longer term next steps (for 2020)
  • Develop recommendations
  • Prioritize and implement
Climate Activities
Scope of Climate

The overall social and professional attitudes, standards, and environment in the Psychology Department.

- Overall climate
- Resources and mentoring
- Academic environments and lab dynamics (for those in labs)
- Work and identity
- Community
- Harassment and discrimination
- Inclusion and belonging
- Diversity
Approach

Climate Survey
- Administered by Harvard College Institutional Research Office
  - Karen Pearce, Scott Spurlock, Lynda Zhang
  - Quantitative data tabulated for descriptive examination
  - Qualitative report based on open-ended responses
  - “In your own words” prompt transmitted directly to us

Open Forum Meetings
- Two forums moderated by graduate students & faculty
- One-on-one conversations with climate committee chair
Climate Report

Today’s focus: Convergent themes

• Quantitative, qualitative, open-ended responses
• Examination of data by subgroup (n>=10)
  • Role within department
  • Gender
  • Race/ethnicity
  • BGLTQ identity
• Cross-referencing data from other departments and surveys

Comprehensive report
Population & Respondents

Overall response rate: 70.6%

245 invited
- Graduate Students: 91
- Faculty: 31
- Admin Staff: 18
- Research Staff: 28
- Postdocs: 77

173 responded
- Graduate Students: 68
- Faculty: 46
- Admin Staff: 21
- Research Staff: 13
- Postdocs: 25

Response rates:
- Faculty: 89%
- Graduate students: 75%
- Admin staff: 72%
- Research staff: 68%
- Postdocs: 60%
Limitations

• 70.6% response rate sufficient for generalization to community at large, but still may not represent full range of viewpoints.

• Some groups contained small numbers of respondents, limiting their examination.
  • Race/Ethnicity: Black and Latinx combined
  • “Other” gender identities combined
  • Intersectional identities could not be examined
I. Overall satisfaction with departmental climate

Everyone in the department
Overall satisfaction with department climate

How satisfied are you with the current climate of the Psychology Department?

Comparison to other recent surveys at Harvard:

Very Much

I am under stress in the department.

I am able to find a desirable work-life balance in the department.

I enjoy spending time in the department.

I can do the kind of work I want to do in the department.

I can be productive in the department.

Whole department (n=171)
Variability among respondents

Due to the lab-centric structure of the department, the lack of a department-wide standard results in highly variable experiences, especially across labs.

Lack of department-wide standards

Many comments reveal a perception that the Psychology Department does not have, communicate, or enforce department-wide standards of conduct.

Without department-wide standards of conduct, survey respondents indicated that individual behaviors can have undue influence on a person’s experience.

Open-ended response from member of our community

“It seems like there is wide variability in diversity, inclusiveness, and climate from lab to lab and little accountability for mentors who create an uncomfortable environment for their mentees.”
Qualitative Analysis of Overall Climate

Positive comments

- Although relatively few in number, the positive responses to the open-ended questions were, in most cases, the flipside of the negative ones.

Open-ended response from member of our community “From my advisor and lab members to the faculty, students and staff outside my lab, I have been extremely fortunate in getting a chance to work with such amazing individuals. Yes, every lab and department must grow and change over time, but I want Harvard Psych to know that I would make the same choice to attend the program again in a heartbeat and would recommend our program to anyone 100 times over.”

Open-ended response from member of our community “Overall, I think the Psychology Department is doing a great job. :)”
II. Resources & Mentoring

Graduate Students and Postdocs

Research Staff, Graduate Students, and Postdocs
Availability of Resources

- Training from faculty (besides mentor)
- Networking opportunities
- Preparation for academic careers
- Technical & statistical support
- Financial support
- Training from primary mentor
- Input/support from lab members
- Space, research tools, & equipment

Graduate Students & Postdocs (n=110)
Availability of Resources

Graduate Students & Postdocs (n=110)

Preparation for nonacademic careers
Training from faculty (besides mentor)

Space, research tools, & equipment

Graduate Students & Postdocs (n=110)
Faculty accessibility

- In some cases, responses indicated that faculty often appeared too busy or too focused on endeavors that didn’t allow for sufficient one-on-one engagements with students/lab members.

How much time do you have with your mentor to work on professional projects?

Research Staff, Graduate Students & Postdocs (n=132)
III. Academic environments & lab dynamics

Research Staff, Graduate Students, Postdocs, and Faculty
Laboratory environment

My lab takes a healthy approach to working.

My lab has positive social dynamics.

Members of my lab treat each other with respect.

My lab’s physical space is safe and comfortable to work in.

My lab upholds high levels of scientific integrity.

All department except admin staff (n=155)
Laboratory environment

The overall social dynamics of my laboratory are positive.

V. Community

Whole department
Postdoctoral fellows and administrative staff report feeling invisible and lacking in community. Postdocs have reported a lack of focused activities for them within the department.
How ‘respectful’ is the department?

![Bar chart showing satisfaction levels for different groups.]

- Administrative Staff (N=13)
- Research Staff (N=21)
- Graduate Students (N=67)
- Postdoctoral Fellows (N=45)
- Faculty (N=25)

- Staff communicated the perception of feeling invisible to other sectors of the department.
There is a desire for a departmental culture with greater community spirit, and a greater focus on health and well-being

- Some comments referenced the desire for a departmental culture focused less on outward markers of achievement and competition and more on collaboration and students’ wellbeing.

Open-ended responses from members of our community

“Honestly, discussing the climate in the psychology department as a whole feels like discussing the climate on the moon: It's not that there is something terribly wrong - there just isn't much climate of any kind. Everyone sticks to their floors, and largely to their labs. [...] Relatedly and generally, it would be good to have a greater sense of community in the department. A lack of any serious initiative on this front leads to a sense of indifference. I suspect that active, vocal faculty support on this issue would strongly facilitate an improvement. At the very least it would signal from the position of authority that a positive community within our department is not a distraction from work or added bonus but rather an important and valued component of our graduate (and human) experience.”

“I feel like the department should try to improve on a sense of community.”
VI. Harassment & Discrimination

Whole department
Experiences with harassment

Harassment, for the purpose of this survey, is defined as conduct that is either severe or persistent enough to interfere with one’s academic or professional performance, limit one’s ability to participate in an academic program, or create an intimidating or hostile academic or work environment.

Have you experienced harassment by someone associated with the Psychology Department?

• 30/169 respondents (18%) said “yes” or “unsure”

Experiences with discrimination

Discrimination is defined as unjust or prejudicial treatment on the basis of race, color, sex, gender identity, sexual orientation, religion, creed, national origin, age, genetic information, military service, disability, or any other legally protected basis.

Have you experienced discrimination from somebody associated with the Psychology Department?

● 29/169 respondents (17%) said yes or unsure

Qualitative Analysis of Harassment & Discrimination

Prevention
- Some respondents acknowledged the department’s recent activities to address issues of harassment, workplace bullying, and intimidation. Despite these activities, comments suggest that prevention and enforcement continue to be a problem.

Lack of accountability
- A common issue raised by graduate students and staff is that the department does not hold individuals accountable for problematic behaviors.

Culture of silence
- There is also a perception that there is a “culture of silence” with regards to problematic behaviors. Harassment, in particular, is an issue that many respondents have experienced, witnessed, or heard about within the department but feel it is an issue that the department is unwilling to actively address.

Open-ended response from member of our community
“One challenge I have experienced is knowing what I should do when I know something is happening but it is not happening to me. This could be a valuable topic to address in future meetings and trainings.”
VII. Inclusion & belonging

Whole department
Inclusion & Belonging

I feel like I belong in the Department of Psychology.

Satisfaction (1-5)
Qualitative Analysis of Identity, Inclusion, & Belonging

Lack of efforts to create inclusive environment

- There are perceptions, especially among graduate students, that the department lacks sensitivity to women, ethnic minorities, students from low socio-economic backgrounds, international students, and individuals with conservative or religious ideologies.

This perception has negative impacts on community members

- Students among these groups report feeling alienated within labs and day-to-day conversation.

Perceived high levels of variability among faculty members in commitment to fostering inclusion and belonging

- Some respondents acknowledged in their comments that there are many psychology faculty who care about issues of belonging and inclusion, but there is the perception that there are also many psychology faculty who do not care about these issues. Graduate students perceive that faculty do not adequately recognize how important it is to feel a sense of belonging and inclusion. Some student comments also suggest that many faculty in the department may not be equipped to address these issues.

- A few individuals characterized these concerns as mere political correctness or identity politics that are destructive to the department.
VIII. Diversity
Perceptions of departmental homogeneity/diversity

"homogeneous"  1  2  3  4  5  "diverse"

Graduate Students (N=67)
Research Staff (N=21)
Postdoctoral Fellows (N=45)
Faculty (N=25)
Administrative Staff (N=12)
There is mostly consensus that the department lacks diversity, especially among the faculty but also among the graduate student population. The most frequently cited area of concern was racial and ethnic diversity. Lack of diversity was also noted for socioeconomic status, scientific ideology/pedigree, and political viewpoints.

Open-ended responses from members of our community

“[…] [Efforts] should include recruiting, hiring, and retaining faculty and students with various minoritized statuses (e.g., sexual minorities, people of Color) *and* those who explicitly study the psychology of oppressed populations.”

“There is still a long way to go with regards to racial and ethnic representation, and even more work to do to make the department more inclusive along the SES axis. Most people in the department are very friendly and welcoming, but there is a lack of acknowledgement with regards to how well off Harvard Psychology labs are, and how elitist they can be.”

“[There is a] "hidden curriculum" […] [that is] is very obvious in the ways staff and students are expected to participate or not in events, lectures, classes, take advantage of specific resources, study in certain ways for graduate exams, and so on. Without the privilege of knowing how to swim the academia sea and where your life savers are, I feel like I am drowning most of the time.”
Effort toward facilitating inclusion and belonging

The Psychology Department undertakes sufficient effort toward creating an inclusive and belonging environment.

Comparison to other recent surveys at Harvard:

<table>
<thead>
<tr>
<th></th>
